Gin Nano

Price per Unit (piece): £999.00 (including 20 % tax)

> Sizes: 9.5 - 11 - 12.5 - 14.
> The 14 m2 is suitable for heavy weight beginners and regular intermediates.
> The 12.5 m2 is suitable for light weight beginners and regular pilots.
> The 11 m2 is suitable for very light weight beginners and regular pilots.
> The 9.5 m2 is suitable for regular and experienced pilots who want to go further in the freeride practice.

inputs. The turn is more 'skiable', without parasitic lift. Lift comes clearly and obviously when you decide.

In 2011 the NANO range goes wider with an additional size to suit everyone, from novices to experienced pilots: the Nano 9.5 m2. This new size will suit very light weight beginners and very regular pilots, a perfect tool for girls for instance, but also for those who want to go further in the freeride practice even if they don't have a strong enough technique to manage the high speed of the Fluid.

The NANO can be delivered complete with a specially designed 'SPEEDRIDER 2011' convertible harness/rucksack, carabiners and the new fast-packing bag. There is also an 'zip and clip' airbag, which is perfectly suited to both school and regular use.

GIN pioneered speedriding in early 2005/2006 winter with the Nano, still a reference today. The 2010 version, designed for schooling and regular practice, is a leap forward from our earlier models.
In addition to the latest technical improvements are a new look and optimized and improved materials, the direct result of our experience of many hours of use in harsh, extreme off-piste environments and also in schools.

The NANO follows the same philosophy as its predecessor: simple, easy, safe and fun. The NANO has a wide speed range, able to be flown slower than its predecessor. In addition, it has a trim system to vary the glide angle to speed up or slow down flight. Adjust the NANO to match your skill and the terrain, even when it is steep. All sizes are very easy to inflate and launch, extremely solid in flight, and offer an easy, progressive and responsive reaction to your

Choose your size according to your weight and - more importantly - experience.
